

AMAJUOYI CHINEKWU FRANCIS

Cybersecurity Analyst | SOC Operations, Cryptography and Security Risk

Lagos, Nigeria | +234 905 5041 8066 | nekwufrancis@gmail.com | [LinkedIn](#) | [Lab Portfolio](#)

PROFESSIONAL SUMMARY

Entry level cybersecurity analyst with nine security certifications from Google, Cisco Networking Academy and Kennesaw State University, and a documented portfolio of seven hands on labs run in Kali Linux and Cisco CyberOps environments. Practical experience across cryptography and PKI, file integrity and digital signatures, network reconnaissance, password policy testing and suspicious file triage. Backed by a B.Sc in Insurance, which brings a working grasp of risk assessment, regulation and compliance to security governance. Handles confidential records daily in a regulated setting and explains technical risk clearly to non technical audiences. Portfolio: <https://chinekwu-cyber.onrender.com>

CORE COMPETENCIES

- Security operations: log review, incident detection and response fundamentals, SIEM concepts, alert triage
- Cryptography and PKI: symmetric and asymmetric encryption, RSA key management, X.509 certificates, TLS chain validation, hashing and digital signatures
- Network security: host discovery, ICMP and ARP analysis, network protocols, vulnerability concepts
- Governance, risk and compliance: security risk assessment, policy support, regulatory awareness, data protection and confidentiality
- Analysis and communication: evidence based documentation, technical reporting, security awareness training delivery

TECHNICAL SKILLS

Operating systems and platforms: Kali Linux, Cisco CyberOps Workstation, Windows, Oracle VM VirtualBox

Tools: OpenSSL, Linux command line and bash, xxd, md5sum and sha256sum, arp, ping, fcrackzip, SIEM tooling concepts

Languages: SQL, Python for security task automation

Documentation: Microsoft Office, lab write ups and evidence logs

CYBERSECURITY PROJECTS

Full write ups with terminal evidence: <https://chinekwu-cyber.onrender.com>

Public Key Infrastructure and Certificate Validation | Kali Linux, Cisco CyberOps, OpenSSL

- Generated separate 2048 bit RSA key pairs for two parties in isolated directories, verifying key structure and enforcing private key separation.
- Retrieved a live TLS certificate chain over port 443 and validated the trust path from leaf certificate to root certificate authority, reading issuer, organisation and verification results at each depth.

Data Protection: Encryption and Recovery | Kali Linux, OpenSSL, AES-256-CBC

- Encrypted a sensitive file using AES-256-CBC with base64 encoding and 10,000 key derivation iterations, then completed a clean decryption round trip to confirm data recoverability.
- Diagnosed and corrected failed encryption runs caused by incorrect key derivation flags, using manual pages rather than weakening the protection settings.

File Integrity and Digital Signature Workflow | Kali Linux, md5sum, OpenSSL

- Produced message digests to fingerprint file contents and generated a signer key pair, demonstrating how signatures bind content integrity to an identity.
- Documented the collision weakness of MD5 and recommended SHA-256 for production integrity checking.

Network Reconnaissance and Host Mapping | Kali Linux, ICMP, ARP

- Swept a lab subnet for live hosts, recorded unreachable results, and used the ARP cache to map IP to hardware address bindings at layer 2.
- Distinguished an unresponsive host from an unassigned address by identifying incomplete ARP resolution, and noted how the same table exposes ARP spoofing.

Password Policy Testing and Artefact Triage | Cisco CyberOps, Kali Linux, fcrackzip, xxd

- Recovered a short archive passphrase in an authorised lab exercise and converted the result into plain language policy guidance on password length and reuse.
- Triaged a suspicious file inside an isolated virtual machine by reading its header bytes, proving the file type contradicted its extension, a common malware delivery technique.

CERTIFICATIONS

- CyberOps Associate, Cisco Networking Academy, 2025
- Cybersecurity Essentials, Cisco Networking Academy, 2024
- The GRC Approach to Managing Cybersecurity, Kennesaw State University, 2025
- Automate Cybersecurity Tasks with Python, Google, 2025
- Assets, Threats and Vulnerabilities, Google, 2024
- Tools of the Trade: Linux and SQL, Google, 2024
- Connect and Protect: Networks and Network Security, Google, 2024
- Play It Safe: Manage Security Risks, Google, 2024
- Sound the Alarm: Detection and Response, Google, 2024
- Foundations of Cybersecurity, Google, 2023

PROFESSIONAL EXPERIENCE

Classroom Teacher (NYSC) | Tess College, Lagos

2024 to present

- Delivered structured lessons to classes of students, translating unfamiliar technical material into plain explanations, the same skill security awareness training depends on.
- Maintained student records and examination data under confidentiality rules, applying access discipline and accurate record keeping.
- Planned lesson schedules and assessments independently, meeting every reporting deadline in the service year.

Pharmacy Assistant | ABJ Pharmacy, Lagos

2023 to present

- Handled confidential patient records and prescription data in a regulated environment, reinforcing data privacy and compliance practice.
- Reduced stock discrepancies by 40 percent through systematic inventory verification and reconciliation of dispensing records.
- Advised customers on prescriptions and healthcare products, resolving queries accurately under time pressure.

EDUCATION

B.Sc Insurance | University of Lagos

Graduated 2023

- Research project: the impact of government policy on the regulation of insurance companies in Nigeria, covering risk assessment, regulation and compliance.

A Levels, School of Foundation Studies | University of Lagos

REFEREE

Miss Chioma Amajuoyi, Customer Support Manager, Triquetra Health, +234 803 534 1831
